Introduction

Last year we published *Nintendo Games Secrets Greatest Tips* in response to the many calls and letters we get every day at GamePro Magazine. Most of the inquiries come from gamers wanting to know if we knew of a trick for a specific game. Answering all of those questions made us realize that, just like us, serious gamers would appreciate a book that enabled them to easily check to see if there were any tricks for whatever game they were currently playing.

Well, we were right! The success of our first volume led us to prepare this new book for Sega Genesis gamers. In this book we've indexed and illustrated all of the secret tips, tricks, and passwords we know of for over one hundred different Sega Genesis games. Inside these pages you'll find our collected game secrets in alphabetical order. All you have to do is look up the title of the game you're interested in and you'll find whatever tricks of the trade we know for that particular title!

And there's more. We've also included a section of tricks which we, at GamePro, refer to as "Yank the Cart Tricks." These tricks can make some amazing things happen to your game, but please read our words of warning. Performing these tricks can damage your Sega Genesis system—so, as always, perform them at your own risk.

Finally, we've included a section on two of the handiest hardware helpers to come down the video pipeline in quite some time. The Action Replay and Pro Action Replay can enhance your game play in some ways you might never have imagined possible. Enjoy!

Psst . . . remember, you're the pros! If you've got any tricks of the trade that we missed, send them to:

Secret Weapons
GamePro Magazine
P.O. Box 3329
Redwood City, CA 94063

If we use your trick, you'll find your name on the pages of GamePro Magazine and we'll send you a GamePro super shirt!

🏰 Alex Kidd in the Enchanted Castle 🏰

Continue

You can continue in Alex Kidd in the Enchanted Castle—but not until you have 1,000 or more Baums of gold!!

Win at Janken

Winning at Janken is important if you're going to outwit Ashra in the Enchanted Castle. Here's what to do: Keep switching your hand as fast as you can until the game stops. Remember that you've got

a 66% chance of either winning or tying, so the odds are in your favor. And remember, once you have the Necklace, use it to read your opponent's mind and win with ease.

Rookietown Level Underground Passage

ground near the second palm tree just past the first Janken House. You'll find bonus items, including a 1-up, down below.

There are many secret passages in Alex Kidd in the Enchanted Castle. To discover the secret passage in Rookietown, jump on the

Prairie Level Underground Passage

You'll find the Prairie's secret passage underneath an orange treasure chest. The treasure chest you're looking for is the next chest past the one guarded by the Eagle, inside of a pyramid-shaped set of blocks. Break the treasure chest to enter. You'll find more bonus items inside this treasure room, including a 1-up.

Tropicstown Level Underground Passage

Look for the secret passage in Tropicstown underneath the first black treasure chest you reach. Just smash the treasure chest and enter the passage to search for power-ups and a 1-up.

Castle Shortcut

The Enchanted Castle is a Kidd killer, but there's a shortcut that Alex can use to make things easier. When you reach the Castle area, fly the Pedicopter up and to the right to a secret ledge on the outside of the Castle.

When you reach the ledge lie on your stomach and punch the wall to make an opening. Crawl inside and you'll begin part-way through the Castle.

Another Castle Shortcut

There's another shortcut near the end of the Castle. Go to the area where you can purchase the Cape. Climb on top of the door and use your Pogo stick to leap into the air and snag a few

coins. Now, crawl to the right and punch the wall of the Castle. Enter the Castle and quickly flip the switch to stop the descending ceiling. Move to the right and punch the walls. In the next room flip the first switch, and then enter Ashra's chambers for the final battle.

✧ Faery Tale Adventure ✧

Power-Up With Special Items

Here's a "faerly" easy trick that enables you to quickly grab tons of treasure in Faery Tale Adventure. Save your game just before you open a treasure chest. Next, open the treasure chest and gather the goodies. Now, save your game again. When you return to the saved game, you'll find you reappear just in front of the

same treasure chest again—and it's been re-filled with loot. Repeat this procedure until you've amassed mucho goodies from any treasure chest.

Super Power Password

It will be a Faery Tale Adventure when you begin with this mega-power password. You'll begin at Tambry's Tavern with plenty of items plus a sword:

★ Fantasia ★

Easy Power-Up!

Bouncing on different creatures often makes special items appear in Fantasia. To snag power-ups right at the beginning of the game, wait until the first Broom that dances along the bottom of the screen reaches the stairs. Bounce on it, and three Crystal Balls, Two Stars, and a Magic Book will appear.

Secret Room

Teach Mickey to lurk in the shadows and he'll find a secret bonus room in the second part of the Castle. Stand in front of this shadow and you'll zap to the secret room. Inside are four Stars and two Magic Books.

1-Up Loop

Fantasia's a Mickey Mouse game if you use this 1-up loop in World 1-2 to max out your lives. Near the beginning of the level you'll reach a series of platforms, the top of which has a musical note on it that gives you a 1-up. Once you've grabbed

the note, continue on until you reach a treasure chest. If you jump into the chest you'll warp back to the beginning of the level. Repeat this procedure, grabbing the note each time, until you have nine lives.

Another 1-Up Loop

No, it's not a fantasy. There is another 1-up loop in *Fantasia*. This one's in the Earth World. Proceed through the level until you reach the first Fairy.

Inside the Crystal Cave, jump to the first platform you reach and grab the Note 1-up.

Keep moving through the cave and grab the Note just past the two boulders.

Grab the third Note just before you reach the Fairy, but don't touch the Fairy.

Instead, let yourself die and collect all three 1-ups again. You can continue to repeat this process until you've maxed out your lives. Psst... this same trick works in the Desert World.

Max Out Your Items

You can leave any area in Fantasia and return to find that all the special items have reappeared. For example, in the Air World, you can go through the Pastorage again and again to snag Notes.

☆ Flicky ☆

A Bikini Babe

If you're faster than lightning at Flicky, the game may have a surprise in store for you. Complete the first 10 rounds in under 20 seconds each and get a perfect score in each bonus round. You should have just over 240,000 points. While you're awarded your bonus, a window will open in the lower-left corner of the screen and a scantily clad girl in a bikini appears.

🌐 Forgotten Worlds 🌐

Continue

In case it's slipped your mind, you can't really continue in a one-player game of Forgotten Worlds, but there is a way to extend the action. Have Con-

troller 2 plugged in and ready to go. When Player One's life meter drops close to zero, abandon him and rev up Player Two. You can continue with the same weapon. When Player Two is ready to drop, crank up Player One. Repeat this trick as many times as you like.

★ Gaiares ★

Configuration Mode

To check out the Configuration Mode in Gaiares just press and hold any button and then press Start. Note: You must release the other button the second you hit Start or the Configuration Mode won't appear on-screen.

You can use this mode to select the difficulty of your game, listen to background music and sound effects, and even choose the C.M. language. Hey, you can even change everything to Japanese!

Stage Select

Tired of dying in Stage 1? Check out some higher stages via this slick trick for Gaiares. Go to the Configuration Mode (see above).

Next, select 18 on B.G.M. Now, press and hold Button A on

Controller 2 and exit the Configuration Mode. A Stage Select screen will appear when your game begins.

Invincibility

Soar into space completely invincible with this trick for Gaiares. During play, pause the game and then simultaneously press and hold Buttons A, C, and Left. If you performed the trick correctly, the screen will freeze temporarily. You have to repeat this trick for each level.

Instant Weapon Power-Up

Use this trick to instantly power-up your TOZ in Gaiares. First, use the Stage Select trick (see above). Now, any time during your game, pause and then press and hold Up and hit Button A twice. Next, un-pause your game and fire your TOZ to receive full power. You'll be zap-happy!

Choose Your Weapon

Pick a weapon, any weapon, with this trick that enables you to choose any weapon in Gaiarses. To begin, perform the Stage Select trick (see above). Next, any time during your game, pause and then press and hold Up and press Button A. Each time you hit Button A you'll choose a different weapon. When you're armed with your weapon of choice, un-pause and fire away.

Secret Weapon!

There's an easy way to receive a special super-charged weapon in Gaiarses called the T-Braster. All you have to do is fire your TOZ six times without hitting any enemies!

✦ Gain Ground ✦

Round Select

If you're feeling up in the air, use this level select trick for Gain Ground to put yourself back on track.

Go to the option screen. Move the cursor to the word "Level." Next,

press Button A, Button C, Button B, and Button C. The words “Round Select” will appear underneath “Sound Test.”

★ Galaxy Force 2 ★

Check Out the Endings

Skip straight to the ending sequences of Galaxy Force 2 with this easy trick. Plug in both controllers. Enter the game's Option Screen and highlight “Exit.” Press and hold Start on Controller

2, and then press Start on Controller 1. Now, prepare to get out of Galaxy Force 2's world.

👤 Ghostbusters 👤

Rack Up the Cash

Don't get slimed! There's an easy way to collect tons of cash in Ghostbusters. Look for a safe that contains money and is close to the entrance of a maze. Grab the safe and leave the maze. Return to the maze and you'll find the safe—and the money—are back! Repeat this procedure until you have all the cash you want.

✂ Ghoul's 'n Ghosts ✂

Level Select

The good news is that there's a level select trick for Ghoul's 'n Ghosts. The bad news is that this trick only works with some Ghoul's 'n Ghosts cartridges. You may have to try it several times to discover whether or not it works with your copy. To test the trick, press the directional button on your control pad Up,

Down, Left, and then Right during the title screen. Next, use one of the following pad combinations to reach your desired level:

Level 1:

The Execution Place: Push Start.

The Floating Island On the Lake: Push Button A and Start simultaneously.

Level 2:

The Village of Decay: Push Up, Button B, and Start simultaneously.

Town of Fire: Push Up, Button A, and Start simultaneously.

Level 3:

Baron Rankle's Tower: Push Down, Button B, and Start simultaneously.

Horrible Faced Mountain: Push Down, Button A, and Start simultaneously.

Level 4:

The Crystal Forest: Push Left, Button B, and Start simultaneously.

The Ice Slopes: Push Left, Button A, and Start simultaneously.

Level 5:

Beginning of Castle: Push Right, Button B, and Start simultaneously.

Second Half of Castle: Push Right, Button B, and Start simultaneously.

Loki: Push Down/Right, Button A, and Start simultaneously.

Invincibility

If Sir Arthur's catching a cold from running around without his armor, we recommend you use this trick to become invincible—but remember that, just as with the Level Select trick, it only works with some Ghouls 'n Ghosts cartridges. Turn on your Genesis and then press Reset four times. Now, when the title screen appears, press Button A four times. Next, press Up, Down, Left, and Right on your directional pad. If you've executed the trick correctly, you'll hear a tone. Next, hit Start to reach the Player Selection screen. Press and hold Button B and hit Start to begin the game. Continue to hold Button B while you play, and Arthur will be invincible!

More Invincibility

If the above invincibility trick was a no go, check this one out. Wait until the title screen appears and then press Button A and Up together, then Button A and Down together, then Button A and Left together, then Button A and Right together, then hold Button B and press Start, then hold Button C and press Start. It's tough to make it work—just keep trying!

Slow Motion Code

Sir Arthur looks pretty cool in slo' mo', but just as with the invincibility and level select codes, this trick only works with some Ghouls 'n Ghosts cartridges. Wait until the title screen appears, and then press Up, Button A, Down, Button A, Left, Button A, and Right. If you've done the trick correctly you'll hear a musical note at this point. Next, press Right and hit Start repeatedly until Sir Arthur appears. Now, press Start to Pause the game and press and hold Button B. Continue to hold Button B and Arthur's in slo' mo'.

Nice Catch Message

It seems you can teach an old knight new tricks. If Sir Arthur grabs the Key that appears at the end of each stage of Ghouls

'n Ghosts he'll be rewarded with the message, "Nice Catch." To catch the Key stand to its right, close, but not too close, and leap to the left. The timing of this is quite tricky, but if you manage to grab the Key you'll see the message and earn a bonus of 5,000 points.

Climb the Mystery Ladder

Here's a "just for fun" trick in the first level of Ghouls 'n Ghosts. Climb the second ladder you reach in Level 1. When you reach the top of the ladder stand in the center, jump straight up, and rapidly hit Left and Right on you controller. Now climb some more—you'll walk on air. It's gotta be the shoes!

✂ Golden Axe ✂

Begin With 15 Lives

Take a hack at Golden Axe with 15 men. Select a two-player game, and immediately let one of your characters die. Now you can use either character as if you were playing a one-player game. This gives you three lives plus four credits left,

for a total of 15 spare soldiers!

Begin With Up to 30 Men

Begin Golden Axe with 30 lives and show Death Bringer just who's the boss. Choose a one-player game in the Arcade Mode.

Next, press and hold Left and Down on your control pad until the warriors spin around continuously. While the warriors are continuing to spin, simultaneously press Buttons A and C. Now, release all of the buttons and press Start. You'll have nine continue credits instead of three.

Level Select

Tired of messing with the peons? Head straight for Death Bringer with this level select trick for the Arcade Mode of Golden Axe. Wait until the character selection screen appears and then press the directional button Down and to the Left so that the three warriors spin around. Now, simultaneously press Button B and Start. If you've done the trick correctly, a "1" will appear in the upper-left corner of the screen. Use Up or Down on the directional pad to change the number and select your starting level.

Axe Death Bringer

Use this trick to bury two or three giant axes in Death Bringer's chest at the end of Golden Axe. In a one-player battle, save your magic until the end of the fight. Just after you've struck the blow that defeats Death Bringer, use your magic. Two axes will fly into the air and bury themselves in Death Bringer's chest. In a two-player game, you can see three axes. Have one player back Death Bringer into a corner and slash him just fast enough not to knock him down. While the first player holds him in the corner, the other player should lure the Skeletons to the far side of the room. If the second player can lead the Skeletons around, they won't attack him and they can't hurt the first player. Finally, just as Death Bringer dies, quickly use your magic. If your timing is right, three axes will bury themselves in Death Bringer's chest.

✂ Golden Axe II ✂

Stage Select

Hack your way right to the heart of the matter with this stage select for Golden Axe II. While the intro screen rolls, press and hold Buttons A, B, and C, and press Start. Continue to hold Button A, and release Buttons B and C. Now,

Continue to hold all three buttons and press Start to choose the normal game. While still holding all three buttons, highlight your character, press Up, and press Start. Now choose any level in the game.

while still holding Button A, simultaneously press Buttons B and C again to enter the Options screen.

Continue to hold Button A, but release Buttons B and C once again. Select Exit on the Options screen, and while still pressing Button A, simultaneously press Buttons B and C to return to the main menu.

Continue to hold Button A, and release Buttons B and C. Now, while still holding Button A, simultaneously press Buttons B and C to choose the number of players.

Bonus Credits

Button A, but continue to press Buttons B and C. Select "Exit" and press

To increase your credits in this fighting fantasy, go to the Options Screen. Simultaneously press Buttons A, B, and C, and keep holding them while you enter the Options screen. Release

Start. Begin a one- or two-player game, press Start, and then press Button A. You should now have eight credits instead of three.

Unlimited Magic

Make endless magic in Golden Axe II with this complicated trick.

Proceed to the end boss of any level, with at least one magic box. During your fight with the boss, press Button A to use your magic and continue to HOLD IT DOWN. Finish off the

boss (while still holding Button A). Release Button A when the thieves begin to move.

Let them steal two of the magic blocks and don't grab any yourself. When your character reappears in the next level he/she will automatically use a magic spell, even though you don't have any magic boxes left. Afterwards, two rows of magic boxes will appear across the bottom of the screen. Use limitless magic, but don't overcharge the magic or the game will freeze.

Secret Level

Pond II: Codename Robocod. To find it, move as far right as possible and then climb the building. When you reach the far right roof, walk left through the wall. You'll warp to a strange area inside of the factory.

★ QuackShot Starring Donald Duck ★

Unlimited Donalds

Now don't quack up. There are several locations in QuackShot where you can rack up tons of extra lives.

In the middle of the first half of the Transylvania area

(outside of the castle) you'll meet up with a member of the Ducky Gang who holds a 1-up.

Snag the 1-up and proceed through the level until you reach the flag.

Instead of entering the castle, call the airplane. Choose Transylvania again on the map screen and return through the first half of the level—backwards!

The 1-up and all other special items will have returned. Repeat this procedure until you have a full stockpile of extra lives.

More Unlimited Donalds

Here's another spot where you can waddle your way to tons of Donalds in QuackShot. First, you'll need to get the Bubble Gum Blaster in Duckburg. Next, go to Dracula's Castle in Transylvania. Move

forward until you reach the first large stack of barrels. Blast the last barrel on the second row to reveal a 1-up. Now, exit the castle and then return. You can grab the 1-up again. Repeat this procedure to earn plenty of 1-ups.

And Even More Unlimited Donalds

Ahoy there matey! You can also rack up tons of extra lives in the Viking Ship area of the game. Climb the mast in the elevator and grab all of the bags of money. When you reach the top of the elevator head to the right. Follow the rope path down and you'll find a 1-up. Next, retrace your steps, leave the screen, and repeat this procedure until you have as many lives as you like.

Bubble Gum Bonus

There's a place in QuackShot where Donald can get all of the gum he needs and more for his Bubble Gun. Go to Transylvania. When you reach the set of blocks shown in the screen, destroy all of the blocks and then jump on top of the one that remains behind. Each time you jump, new gum will appear. Gather it and jump again. Donald's stoked!

Egyptian Shortcut

Donald's a duck not known for his speed, but there is a way to make a quick exit out of Egypt in QuackShot. When you reach the first ladder in the level, scale it, and the wall. When you reach the top waddle right and you're outta there.

Stop the Wall From Falling

There's an easy way to keep the wall from falling on Donald in the Egyptian area of QuackShot. When Donald reaches the Falling Wall, simply have him waddle to the right and jump on the icons in the following order: Sun, Moon, Star.

Limited Invincibility

Yo! You can earn limited invincibility in the second mission of Rambo III. When you reach the second mission, move up and to the far left from the starting point until you reach the destructible box. Head to the left until a shiny bit of the box is showing. Wait until no enemy soldiers are on-screen and then destroy the box with an arrow. At the moment of impact, move left as far as you can with a patch of smoke behind you. Rambo will become indestructible until he reaches the bonus stage where bombs, helicopters, or tanks can do him in. Warning: If Rambo destroys any other boxes he'll lose his invincibility.

Make A Quick Escape

Become a quick escape artist with this prison breakout trick for Round 2 of Rambo III. Rescue the two left prisoners first, and then head for the last prisoner in the upper right hand corner. Once you've rescued him, place bombs in a line down the wall on the left-hand side of the prison cell. When these bombs blow, they'll blast an opening in the wall. Run through the hole to escape with time to spare!

★ Revenge of Shinobi ★

Unlimited Shurikens

Shinobi's a slice and dice machine with this easy trick you can use to earn unlimited Shurikens in *Revenge of Shinobi*. To perform the trick go to the Options Screen and select 00 Shurikens. Now, wait for 15 seconds. The 00 changes to an infinity symbol. Now your knives are neverending.

Bust the Rainbow Shot

The Rainbow Shot is your strongest weapon in *Revenge of Shinobi*. To perform this slick Shuriken-tossing trick, press the jump button and then quickly press Up on the directional pad and hit jump again to somersault. Finally, hit button B during your somersault and you'll toss eight Shurikens at once. When Shinobi uses this in combination with the Unlimited Shurikens trick above, he's a true master of the martial arts.

Tons of 1-Ups!

Shinobi's tough, but a few extra 1-ups won't hurt. You can max out on 1-ups in Round 3-2, the Cargo Jet, of *Revenge of Shinobi*. When you reach the Jet, head for the elevator and go up. Move right on the upper level until you reach the second elevator. Now, go down and shoot the last box on the upper

level. There's a 2-up in the box. Once you've grabbed the 2-up, let yourself die! You'll lose a life, but gain one in the process. Repeat this technique and fill up your life line! The counter won't register more than nine, but you can keep earning extra lives until you're satisfied.

More 1-Ups!

Pump up your 1-ups again in the Motor Kill, Round 4-2, of *Revenge of Shinobi*. When you reach Mission 4, move to the edge of the first ledge, jump, and execute a Rainbow Jump. A box with a 2-up will

appear just under the conveyor belt. Jump to grab the box. You'll die, but earn an extra life in the process. Repeat this procedure over and over to earn mucho lives.

Earn 30,000 Bonus Points

What ninja would turn down 30,000 bonus points? One who can't multiply! To earn 30,000 bonus points at the end of any round of *Revenge of Shinobi*, you have to finish the level with enough Shurikens to equal 11 times the number of lives you have remaining. If you can count and fight at the same time, the points are yours.

Escape From the Final Maze

You'd be amazed at how complex the last level of *Revenge of Shinobi* is. Here's our escape route for the Level 8-2 maze:

Enter the maze and move to your right, jumping over the first circle door. Head down and to the right into the little lower room and enter the next circle door you reach. Next, enter the circle door immediately to your right. As you go

through the door hold Right on the directional pad to avoid falling into the pit on the other side of the door.

Move right and jump over the first circle door you reach. When you come to a dead end, move left, crouch, and jump into the small opening. Grab all of the power-ups in this secret room so you'll be ready to defeat Neo Zeed at the end of the game.

Leave the secret room through the small opening and head up, jumping from wooden platform to wooden platform. At the top move to your left until you can't

proceed any further. Now go up and to the right. Enter the circle door to the far right.

Continue to your right until you reach a wall. Jump over the wall and go through the small opening.

Fall straight down on the other side of the wall in order to avoid landing in the door at the bottom. Jump over the door to the far right and you'll land between two crates.

Move left and crouch underneath the walls. Enter the first circle door you reach after you pass the rifle snipers. Now, go left and battle the flying ninjas. Take the far left bottom door, and you're out of the maze. Time to battle Zeed!

Keep Naoko Alive

Yipes! You gotta finish Neo Zeed fast in *Revenge of Shinobi* or Naoko will get squashed by a cement slab. To save Naoko, jam the gear mechanism of the slab. Stand near the right wall and use a Rainbow Jump. Some of your

shurikens will hit Zeed and some will jam the gear mechanism of the slab. Listen for a creaking sound to know if you've performed the trick correctly. The wall only stops for two or three seconds, so keep jumping until Zeed is a goner.

Kill Neo Zeed Quickly

Zeed's an ugly dude. Here's the trick to use if you want to kill him fast. First off, stock up on Ninjitsu Magic during Level 8, and save it for Zeed. When you enter the room where you'll battle Neo Zeed, immediately use your Ikazuchi Magic. When Zeed reaches the floor and is ready for battle, kneel next to him and start firing at will. Your Ikazuchi Magic lasts for ten seconds. When you lose it, immediately use the Ikazuchi Magic again, kneel next to Zeed, and continue to fire as rapidly as you can. Zeed's done for in about five more seconds!

◆ Shadow Blasters ◆

Invincibility

There's not a shadow of a doubt that this little two controller trick gives you invincibility in Shadow Blasters. Wait until the title screen

appears and then choose a two-player game. Select your characters. Once you begin play, let Player One's energy level drop down to the last block on your life bar. Now, while rapidly pressing Start on Player Two's control pad, let Player

One get hit once more. Player One's character will flash in the center of the screen and become invincible. You can repeat this technique for each of your characters. Just remember that you can't pick up energy while you're invincible, although you can pick up everything else.

Wait until the title screen appears and then simultaneously press Buttons A, B, and C, and then press Start. A third option called "Stage Practice" will appear on the menu screen.

Bonus Round 3-Up

Show them you're not just another ninja by scoring a 3-up in any bonus round of Shadow Dancer. All you have to do is zap 50 ninjas. The

easiest way to do this is to move over to the far left of the screen and fire as rapidly as possible.

If you're feeling lazy, snag an easy 1-up in any bonus round of *Shadow Dancer*. Just let yourself fall through the bonus round without firing any shurikens or nailing any ninjas.

A Bunch of 1-Ups

Here are the locations of most of the 1-ups in *Shadow Dancer*:

Stage 1-2: There's a 1-up where the second set of debris drops out of the sky and the Roly-Poly sits.

Stage 2-1: There's a 2-up on the bottom right-hand corner of the bridge.

Stage 2-2: Near the end of the train is a 1-up. It's above the right side of the last car!

Stage 3-1: To snag a 2-up, power up and then zap the lone Spinning Warrior on the extreme right side of the ground floor.

Stage 4-1: There's a 1-up suspended over this pit.

Stage 5-1, Room 3: Try to snag this 1-up.

200,000 Extra Points

Use this trick to snag 200,000 bonus points each time you kill a boss in Shadow Dancer. Attack the boss until his defense is down to his last one or two flames. Now, dodge his attack until the clock starts the 10-second countdown. When the clock winds down to the last second, use your ninja magic. The computer will reward you with an extra 200,000 points! This trick works on every boss except for Stavros (the final boss).

Make Tunnels at Dead Ends

Sonic's got a nifty move that enables him to make tunnels in areas that seem like deadends, such as in the Starlight Zone, Act 1. Look for these rooms in places where the walls or cliffs have a different, rough texture. Run straight at the wall and just before you reach it, push Down to use your Super Sonic Spin Attack. This blasts Sonic through the wall and he can collect whatever goodies are hidden on the other side.

1-Ups, Hidden Rooms, and Rings and Things

Here's a few 1-ups that'll make Sonic the Hedgehog a little easier to master. There's a basic strategy you can use when hunting for 1-ups that makes it easy to rack up lots of extra lives. In any level where you can earn three or four 1-ups, grab them all and then die before you reach the end of the level. You'll lose one life but keep the others you gathered. Now you can replay the level and gather more lives. Repeat this procedure until you have as many lives as you want.

Green Hill Zone

Act 1-1: When you reach the first platform with a Super Ring monitor, jump into the tree just to the right of the platform. Use the hidden spring to reach a secret cache of Rings.

Act 1-2: Go left past the Power Sneaker on the lower path. You'll pass two Springs. Bounce up to the left and you'll reach a red spring. Jump on the red spring and veer slightly to the left as you

Act 1-2: Use Sonic's wall-crashing technique just to the left of the Power Sneaker. Inside this secret room you'll find two Super Rings and a Shield.

fall. If you're lucky you'll land on the top of the loop where you can snag mucho Rings and a 1-up.

You can also snag this 1-up by using the Power Sneaker. Once you've strapped them on make a running start from the bridge and then leap to grab the 1-up.

Act 1-3: You'll find another hidden room to blast through at the right end of the lower path.

Act 1-3: There's another secret hidden room with a 1-up in this act. Advance Sonic until he reaches a solid wall (where you can't move ahead without using the bumper). Use the Tunnel technique to blast Sonic through the wall to a secret speed tunnel.

Keep moving ahead without jumping on any bumpers. When you reach the area with the blue water background you'll find six monitors at the base of the waterfall.

Act 1-3: Look for a series of floating ledges to the right of a high lamppost. When you find the ledges, jump on the second one to the right of the post, and then fall straight down.

With luck you'll land on top of the loop where you can snag a 1-up.

Marble Zone

Act 2-2: There's a hidden room just next to the lava pit with a group of lava spouts. Usually you would jump up to continue. Instead, run and jump on the single block resting against the left side of the wall.

You'll blast into a secret room. Inside this hidden room you'll find two Super Rings and a 1-up.

Act 2-3: Look for a spiked weight with a space to its right where Sonic can stand. Slip into the space where the weight falls and blast through the wall to the left. Inside you'll find a hidden room with a 1-up. P.S. To escape you can either go back the way you came, or jump up.

Spring Yard Zone

Act 3-1: For tons of power-ups, look for the button and platform near the beginning of the Act. Jump on the button and climb on-board the platform to ride to a special area.

Act 3-1: There's a hidden tunnel in the first shaft after the tunnel lamppost. Hold right as you jump off the yellow bumper and you'll enter a secret Ring tunnel.

Act 3-2: To discover a hidden Ring tunnel in this Act, look for a group of six red bumpers and jump on the one to the far right, while holding right. You'll enter a secret tunnel with a bumper that shoots you to a Ring shaft.

Act 3-2: As you move along the lower path of this Act, you'll reach two red bumpers. Jump on the one to the right and hold right to land in a hidden tunnel. Inside you'll find Rings and a 1-up.

Act 3-3: Jump on the red bumper to the left of the second lamppost. Run up until you reach a floating platform. Use the floating platforms to reach a green ledge. Next, move to the right and blast through the wall to enter a secret tunnel. Inside you'll find a 1-up and a Shield.

Act 3-3: When you reach the pinball area, use the ramp to run around and to the right. As you reach the right-hand side, hold Right on your control pad and you'll enter a secret room.

Labyrinth Zone

Act 4-2: There's a giant room in this Act that seems to have no entrance. To gather the goodies all you have to do is look

for the door button that's hidden behind a video monitor. It's hidden behind one of the monitors on the ledges above the water.

Act 4-3: In this Act there's a secret room to the right of the tidal wave area. To reach the tidal wave, fall down the hole in the middle of four spikes.

After the tidal wave move to the right. When you reach an area with lots of ledge and pulleys, search the left wall to find the secret room. The door is open, but you'll have to enter the room by falling from above. Inside you'll find four Super Rings and a 1-up.

Star Light Zone

Act 5-1: Grab the 1-up at the start of this zone, run a little ways down the ramp, and then back up. This clears the blocks around the 1-up.

Act 5-2: Reaching the 1-up in this Act is pretty tricky. From the beginning, head right until you come to the collapsing ledges. Jump down the hole left by the ledges and move to the right. When you reach an area with floating ledges and a ramp to the right, take the ramp. When you see another ramp above you, jump on it and eventually you'll reach a Super Ring, Invincibility Monitor, and a 1-up.

Act 5-3: Use the ramps and catapults to stay in the middle of this Act and you'll easily spot a 1-up. Use a catapult to bounce left into a secret room.

Scrap Brain Zone

Act 6-2: There's a 1-up along the upper path in this act.

Act 6-3: If you keep moving to the left in each area of this Act, you'll eventually reach a 1-up. It's hidden in a room to the far left of the Act.

Part III

Action Replay and Pro Action Replay

Hardware-Helpers

If you can't make it past that level, bust that boss, or figure out how to survive that barrage of enemy fire, you just might want to read this section. There's an entire new line of game-busting products, hardware-helpers as it were, that'll give you an unbeatable edge. Our favorites are the Action Replay and Pro Action Replay. Check them out!

Made by Datel Electronics, the Action Replay and Action Replay: Pro Version work with Genesis or Mega Drive games (they come with Mega Drive adaptors) and make magic happen with your favorite video games.

The Action Replay is a snap to install. Simply connect your cart to the device, then plug the Replay into your Genesis. Now the fireworks begin. A code book, which comes bundled with the Replay, contains "cheat" listings for approximately 50 games. Typical codes include extra lives, invincibility, level warps, and instant power-ups. You can key in up to four codes at the Parameter screen, and use the Enable switch to activate and deactivate the codes' effects.

Unfortunately, some of the codes apply to Japanese carts only. Although the initial code selection was limited, we've got the expanded list for you on the following pages.

The regular Action Replay is shock therapy for your Genesis, but there's a hard-core model that could fry its microchips! The Action Replay: Pro Version has an awesome feature—user-friendly programmability.

In this version, the Enable switch has a third setting called "Trainer." Flick it on and you can use five different techniques to find your game's codes—Countable Number, Timer, Energy, Status, and Slow but Sure. Each is different in execution, but the principle is the same. You play your game, isolate a statistic, and feed that statistic's numerical value into the Action Replay. You keep changing the numerical value until the Trainer isolates a beneficial code.

For example, if you want extra lives in Strider, you enter your starting lives (five) into the Trainer. The Trainer looks for the number five in Strider's program. Then you play the game, lose a life, and provide the number four. Repeat this process until the Trainer discovers Strider's life code.

The Pro Version won't pull off really weird code creations, such as a skywalking Sonic, but the techniques help resourceful users create basic cheats for nearly any game. The Trainer is a great complement to the codes documented in the manual.
